Crimson Red exhibits a uniform brick-red colour and fine-grained texture. Its distinctive deep reddish hue gives it an enduring visual appeal and is used in iconic Indian monuments, underlining its cultural significance and long-term durability

- ✓ Extremely durable, with high compressive strength and abrasion resistance suited for heavy traffic areas
- ✓ Ideal for exterior use in varied climates and its colour remains stable even under prolonged sun exposure
- ✓ Low water absorption and a compact structure resists moisture penetration, frost damage, and efflorescence

Physical Properties	
Apparent Density (kg/m ³)	2,200 – 2,400
Water Absorption (%)	2.5 – 10.0

Mechanical Strength	
Compressive Strength (MPa)	100 – 150
Flexural Strength (MPa)	10 – 20

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
