Architecture

Defined by its rich black hue and smooth crystalline depth, Lunar Cove symbolises strength and refinement. Its dense structure and mechanical stability make it a versatile choice for demanding architectural applications, from sleek interiors to weather-exposed exteriors.

- ✓ Exceptional durability and compressive strength ensure long-term structural performance
- ✓ Low water absorption and abrasion resistance maintain the stone's finish over time
- ✓ Reliable slip resistance across finishes provides safety and sophistication for floors, steps, and façades

Physical Properties	
Apparent Density (kg/m ³)	2,700 – 2,800
Water Absorption (%)	0.1 – 0.2

Mechanical Strength	
Compressive Strength (MPa)	150 – 160
Flexural Strength (MPa)	12 – 15

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
