Architecture

Characterised by its deep black tone and subtle mineral sheen, Midnight Sparkle offers a sense of sophistication grounded in strength. Its tightly interlocked grain and dense composition give it resilience, making it a dependable material for refined architectural designs and demanding exterior settings.

- ✓ Compressive durability supports long-term structural integrity under pressure and load
- ✓ Low absorption and compact texture resist moisture and surface wear
- ✓ Flexural performance ensures stability and balance, ideal for paving, cladding, and precision detailing

Physical Properties	
Apparent Density (kg/m ³)	2,800
Water Absorption (%)	0.1

Mechanical Strength	
Compressive Strength (MPa)	180
Flexural Strength (MPa)	15

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
