Silver Chrome is a dense, fine-grained grey limestone with subtle streaks and natural variation that bring depth to any design. Engineered for performance, it resists frost, wear, and water absorption – making it ideal for high-traffic interiors, outdoor paving, and architectural applications alike.

- ✓ Extremely low porosity and water absorption
- ✓ High compressive and flexural strength
- ✓ Outstanding abrasion resistance for busy spaces
- ✓ Excellent slip resistance for safe indoor and outdoor use

| Physical Properties | |
|---------------------------------------|-------|
| Apparent Density (kg/m ³) | 2,700 |
| Water Absorption (%) | 0.1 |

| Mechanical Strength | |
|----------------------------|-----------|
| Compressive Strength (MPa) | 120 – 230 |
| Flexural Strength (MPa) | 13 – 25 |

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
