Amber Charm’s distinctive golden-yellow colour is visually warm and attractive, structurally sound, and has been prized for centuries as a building material. It is commonly used as cladding for building exteriors and boundary walls or façades and decorative wall panels. Its honed or textured surface makes it suitable for residential and hotel flooring.

- ✓ Very durable for outdoor paving – such as garden pathways, driveways, patio paving, and pool decks
- ✓ Fashioned into landscape elements like step treads, retaining walls, curb stones, and pool coping
- ✓ Low thermal conductivity helps interiors remain cool in hot climates

Physical Properties	
Apparent Density (kg/m³)	2,200 – 2,400
Water Absorption (%)	upto 10

Mechanical Strength	
Compressive Strength (MPa)	100 – 150
Flexural Strength (MPa)	10 – 20

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
