Golden Drift displays a uniform buff-beige tone and fine-grained texture, often with subtle natural veining. It is prized for its attractive, understated appearance. It is used widely for patios, pathways, courtyards, and garden walkways, where its slip-resistant surface and strength are advantageous. Its natural rough finish also makes it ideal for pool decks and poolside copings, providing style and safety in wet areas.

- ✓ Extremely hard and durable makes it withstand harsh weather, erosion, and climatic extremes
- ✓ Low porosity and water absorption prevents frost damage and enhances frost resistance in cold climates
- ✓ Bears heavy loads and foot traffic without cracking

Physical Properties		Mechanical Strength	
Apparent Density (kg/m <sup>3</sup> )	2,200 – 2,400	Compressive Strength (MPa)	100 – 150
Water Absorption (%)	upto 10	Flexural Strength (MPa)	10 – 20

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
