Striking in its deep, uniform tone and fine-grained finish, Midnight Terrain is a material of contemporary strength and clean sophistication. Its crystalline makeup offers toughness and weather endurance, making it a preferred choice for high-performance construction and modern design environments.

- ✓ Structural robustness ensures long-term reliability under load and environmental stress
- ✓ Low absorption and refined texture resist moisture and surface erosion, preserving its sleek finish
- ✓ Superior flexural capability delivers dependable stability and versatility in architectural and landscape uses

Physical Properties	
Apparent Density (kg/m ³)	2,800
Water Absorption (%)	upto 0.5

Mechanical Strength	
Compressive Strength (MPa)	300
Flexural Strength (MPa)	25

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
