With its cool grey palette and subtle crystalline sparkle, Silver Ash combines beauty with performance. Tested for strength, slip resistance, and abrasion durability, it performs across varied finishes – making it a dependable choice for refined interiors and high-traffic architectural spaces.

- ✓ Compressive and flexural strength ensure consistent structural reliability under heavy use
- ✓ Low water absorption and strong slip resistance make it ideal for flooring, paving, and exterior façades
- ✓ Excellent abrasion resistance maintains its elegant finish even in demanding environments

| Physical Properties | Mechanical Strength | |
|---------------------------------------|---------------------|----------------------------|
| Apparent Density (kg/m ³) | 2,700 – 2,800 | Compressive Strength (MPa) |
| Water Absorption (%) | upto 1 | Flexural Strength (MPa) |

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
