With warm golden-brown tones with distinctive wood-like grain patterns, Woodland Grain typically has a creamy yellow to beige base colour with striking brown or orange veins that mimic the grain of teak wood. This gives the stone an aged-wood look, making it visually unique.

- ✓ Known for its robustness and ability to withstand harsh weather
- ✓ Holds up well in varied climates (from intense sun to rain or frost) without significant degradation
- ✓ Each slab's unique banding ensures a one-of-a-kind aesthetic, adding character to installations

Physical Properties	
Apparent Density (kg/m ³)	2,200 – 2,400
Water Absorption (%)	upto 10

Mechanical Strength	
Compressive Strength (MPa)	100 – 150
Flexural Strength (MPa)	10 – 20

Dimensions, thicknesses, and configurations of slabs can be customised in accordance with specific project or client requirements. Technical data sheets, quality certifications, and laboratory test reports can be furnished upon request or as required by the project specifications. Images are digitally created for representational purposes to convey tone and character; natural stone may vary in colour and pattern.

All product descriptions, images, and specifications are provided for general information and illustrative purposes only. Natural stone is a product of nature; variations in colour, texture, and veining are inherent and should be expected. While every effort is made to ensure accuracy, the actual material may differ slightly from samples or photographs. Performance characteristics, such as durability and slip resistance, may vary depending on installation, finish, and maintenance. The company reserves the right to change product information without prior notice.
